Michael Zeta

Full-Stack Web Developer

(951) 662-1120   michael@a2zeta.com   Rancho Cucamonga, CA

Professional Summary

Full-stack developer and CS-bound student specializing in the React ecosystem. Proven track record of building, deploying, and maintaining production-ready web applications for real business owners. Highly proficient in shipping end-to-end features using **Next.js, TypeScript, Tailwind CSS, and Supabase**. Passionate about clean UI components, seamless API integrations, and contributing to fast-moving, product-led startups.

Technical Stack

▷ Next.js & React	▷ TypeScript / JavaScript	▷ Tailwind CSS
▷ Supabase & PostgreSQL	▷ REST API Integration	▷ Technical SEO (JSON-LD)
▷ Git / GitHub	▷ Netlify & Vercel	▷ Stripe Integration
▷ UX/UI Component Design	▷ CMS (Payload / Sanity)	▷ Agile Methodologies

Full-Stack Projects (Outside Coursework)

The Second Messenger Web Platform

Independent Full-Stack Application

- Architected and built a highly performant, server-side rendered website utilizing **Next.js** and **Tailwind CSS** to manage a multimedia brand.
- Configured a custom backend using **Payload CMS** and integrated external databases for dynamic content delivery and asset management.
- Designed a responsive, modern UI/UX resulting in seamless media playback and content discovery across all devices.

Rockstars of Tomorrow Digital Operations

B2B SaaS Integration & Web App

- Led the digital transformation of a brick-and-mortar business, designing and deploying a responsive frontend using **Next.js** and Netlify.
- Built a custom eCommerce portal with full **Stripe API** integration to handle summer camp registrations, creating a fully automated, passive revenue stream.
- Engineered complex API integrations to synchronize the frontend with "Opus One" (third-party business logic software), streamlining lead capture and client scheduling.

Development Experience

Jun 2013 – PRESENT

Founder & Lead Full-Stack Developer

A2Zeta Creative Design, Rancho Cucamonga, CA

- Architect custom web solutions for local businesses, translating vague client requirements into functional, code-based reality using modern JavaScript frameworks.
- Build and refine frontend UI components, ensuring accessibility, performance optimization, and cross-browser compatibility.
- Manage the complete software development lifecycle (SDLC) from UI wireframing to backend deployment, utilizing Agile methodologies to ship real features on tight deadlines.

Jun 2021 – Jan 2022

Technical Project Lead (Contract)

Valiant Eagle, Inc., Los Angeles, CA (Hybrid)

- Designed a modular "assembly line" workflow for web development, establishing clear hand-off protocols between UX design, frontend development, and DevOps teams.
- Audited existing technology stacks and provided strategic documentation to leadership regarding the integration of modern headless CMS and e-commerce solutions.

Education

Expected: June 2027

Chaffey College, Rancho Cucamonga, CA

Computer Information Systems (Planned Transfer: CS at Cal Poly Pomona)

- **Cumulative GPA:** 3.94 (Dean's List)
- **Relevant Coursework:** Intro to Computer Programming, Prog Concepts & Methodology, Calculus I.
- **Leadership:** Phi Theta Kappa Honors Society Member.
